TRAINING HUB 365

TRAINING THAT ELEVATES YOUR TEAM

Aleshire INNOVATIONS

What IS IT

Training Hub 365 is a learning and development membership program that grants unlimited access to our robust schedule of multifamily focused training sessions. With new session topics being presented each month, everyone on the team will have access to curriculum that supports their own role specific development needs.

Schedule
INFORMATION

In order to accommodate a wide range of role specific needs, we present 4 topics each month.

Getting everyone in the company together at the same time is virtually impossible, this is why we facilitate each session 3 times monthly.

Every company employee is granted unlimited access to all sessions. This means that your entire workforce has 12 opportunities to attend live training events each month.

Customer
FOCUSED

Let's face it, having to log in and navigate through another platform adds unnecessary frustration. To simplify the process, we have LMS ready assessments to allow tracking within your preferred learning management system.

All sessions are accompanied by thoughtfully designed resource guides.

Inclusive INTERACTION

Our mobile interface allows all learners to simultaneously participate with any smart device.

Mobile devices are not required for participation, however; we've found that the element of gamification makes participation practically irresistible!

No downloads or user account information is required to participate. When a session is about to start, all attendees are given the opportunity to join via QR scan or URL login.

i
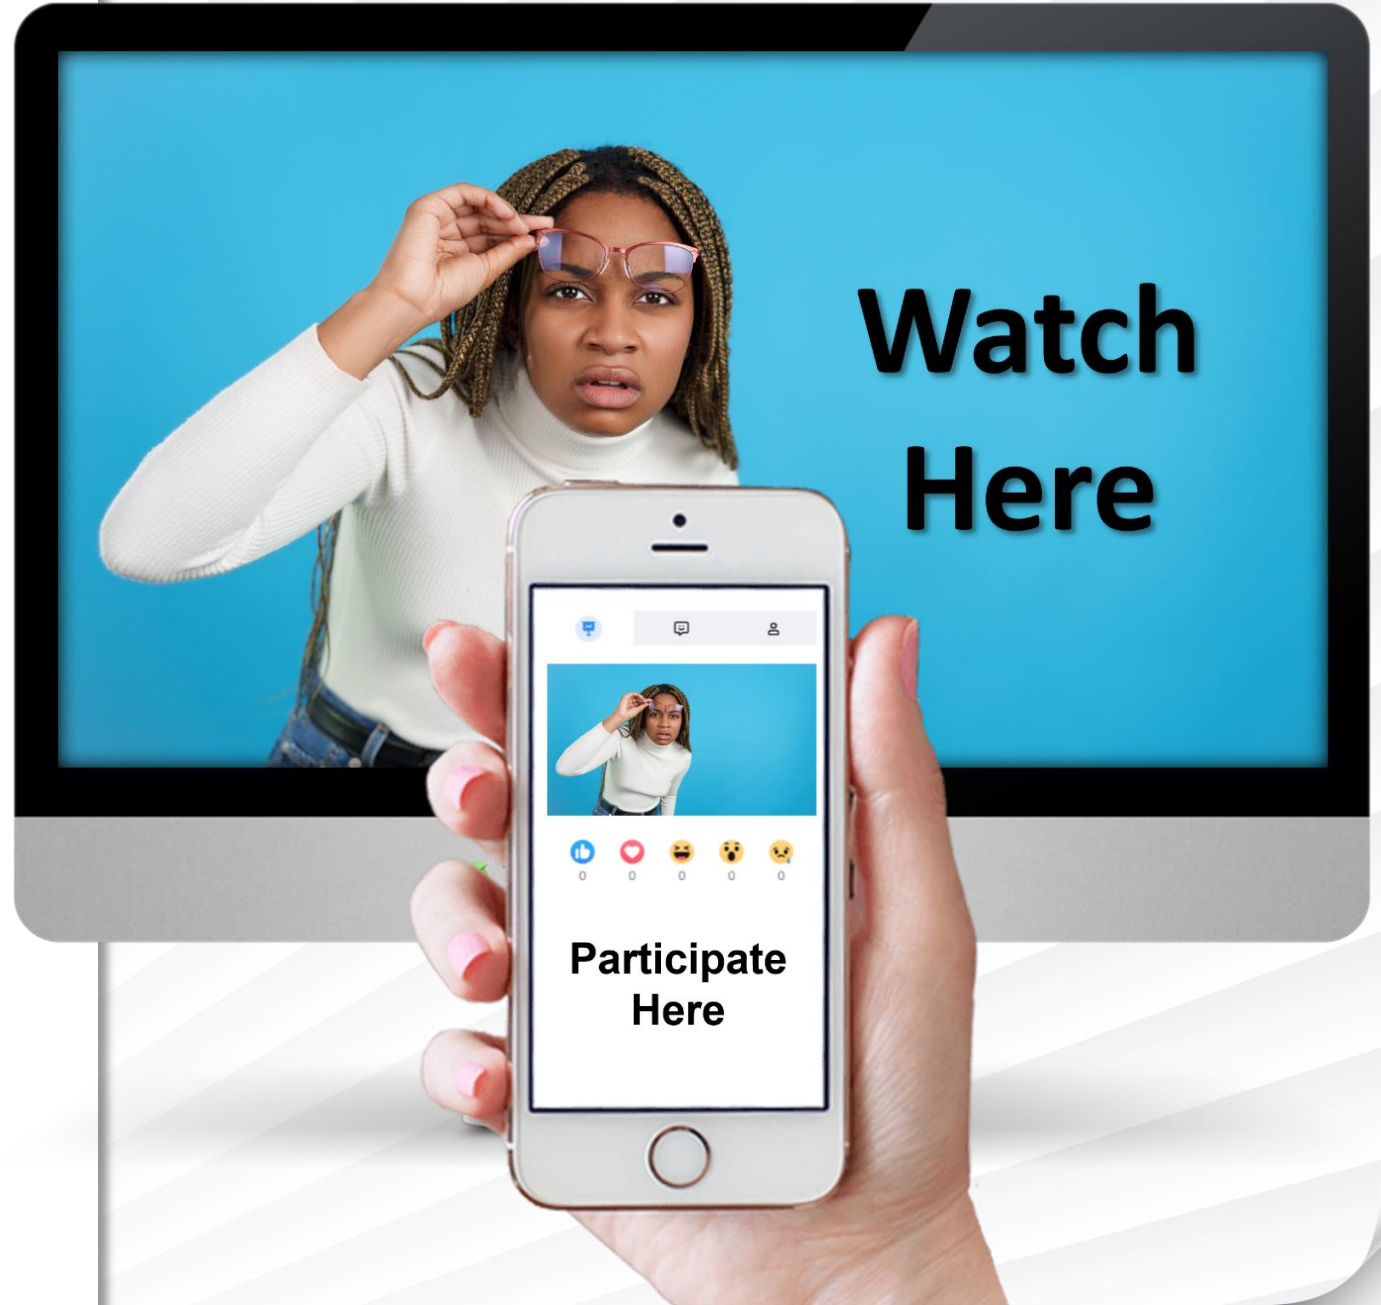

Designed
FOR GROWTH

We design curriculum with thoughtful consideration for the learning experience.

Rather that overwhelming people with data overload, we focus on retention of information.

With learning objectives that strategically target behaviors, we are able to achieve 3 critical goals:

1. Communicate the importance of the message.
2. Visualize understanding through scenario-based activities.
3. Reinforce retention of information through gamification.
